

## ENACT – What?

The aim

Starting on the 1<sup>st</sup> of September 2014 and lasting for 24 months, ENACT is a European initiative which aims to contribute to the definition and implementation of a **common frame** for the professional **qualification and competences of energy auditors**.

Funded within the Erasmus+ programme, ENACT intends to deliver a **common EU based qualification system for energy auditors and the integration and development of open educational resources and definition of training resources**.

## ENACT - Who?

The Partners

The consortium is composed by European representatives of the main stakeholders of the training, competencies' identification and profiling of energy auditors.

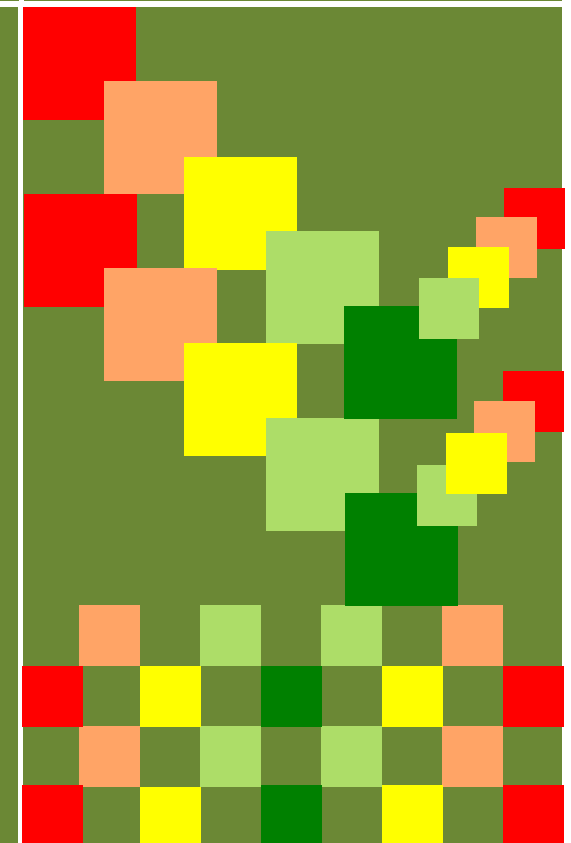

6 partners coming from 4 European countries (Italy, Portugal, Poland and Spain) will actively collaborate on ENACT.

-  AISFOR – Training company
-  RENAEL – National energy agency network
-  ADENE – National energy agency
-  KAPE – National energy agency
-  APADGE (Spain) – Professional Association
-  INCOMA (Spain) – training company

# ENergy Auditor Competences Training and Profiles

# ENACT – why?

## The background and impact

ENACT impact fits within the Europe2020 strategy and in particular with the achievement of the targets for “Climate change and energy sustainability”. ENACT will have a high strategic impact at national / European level:

- 1) Improved management of buildings and increased their energy efficiency ,
- 2) Increased innovation related to specific technologies and techniques for energy efficiency,
- 3) Increased training (quantitative and qualitative) on energy efficiency issues – new, well defined and structured courses to train the new figure of energy auditor according to the national / regional standards.

*“Member States shall ensure that the energy performance certification of buildings and the inspection of heating systems and air-conditioning systems are carried out in an independent manner by qualified and/or accredited experts, whether operating in a self-employed capacity or employed by public bodies or private enterprises.*

*Experts shall be accredited taking into account their competence.*

*Member States shall make available to the public information on training and accreditations. Member States shall ensure that either regularly updated lists of qualified and/or accredited experts or regularly updated lists of accredited companies which offer the services of such experts are made available to the public.”*

Directive 2010/31/EU (EPBD recast) Article 17 on Independent experts

# ENACT – what?

## The activities

The activities within the 24-month project period in the participating countries (Italy, Portugal, Poland and Spain) are:

- ❖ **Analysis of the existing training / qualification frame of energy auditors** – overview of the national / regional legislation for the transposition of the European Directive on energy performance buildings, the professional qualification system, the relative compulsory (formal) training and the informal and non formal training;
- ❖ **Comparative analysis** of the national frames and preparation of the inter-country matrix to define the common issues as well as the best practices of the “**Energy Auditors Competencies and Professional Profiles**”;
- ❖ **Definition of the learning outcomes and program for the training** of the energy auditors and of the relative ECVET (European Credit system for vocational education and training) and the relative learning resources and material;
- ❖ European and National **validation of the professional figure of energy auditor** as trained and qualified through the above-defined training and qualification process;
- ❖ Design and creation of an **ICT system**, modules and tools to implement the above-defined training and qualification process and its overall validation;
