

ENERGY AUDITORS COMPETENCIES, TRAINING AND PROFILES: ENACT

Starting on the 1st of September 2014 and lasting for 24 months, ENACT is a European initiative which aims to contribute to the definition and implementation of a **common frame** for the professional **qualification and competences of energy auditors**.

Funded within the Erasmus+ programme, ENACT sees the collaboration of training companies, energy agencies and professional qualification bodies coming from 4 different European countries: Italy, Portugal, Poland and Spain. The partners, under the coordination of the Italian training company AISFOR are: RENAEL (Italian Network of energy agencies), ADENE (Portuguese National energy agency), KAPE (Polish National energy agency), APADGE (Spanish association of energy auditors) and INCOMA (Spanish training company).

In order to reach the main result of ENACT - **common EU based qualification system for energy auditors and the integration and development of open educational resources and definition of training resources** - the activities to be developed within the 24-month project period include:

- **Analysis of the training programmes and qualification frames in the participating countries** – including an overview of the various national and regional legislation for the transposition of the European Directive on energy performance buildings, the professional qualification system, the relative compulsory (formal) training as well as the informal and non formal training;
- **Comparative analysis** of the various national frames to share the common issues as well as the best practices in order to define the “**Energy Auditors Competencies and Professional Profiles**”;
- Definition of the **learning outcomes** and program for the training of the energy auditors and of the relative **ECVET** (European Credit system for vocational education and training) as well as the relative learning resources and material;
- European and National **validation** of the professional figure of energy auditor as trained and qualified through the above-defined **training and qualification process**;
- Design and creation of an **ENACT technology enhanced system**, modules and tools to implement the above-defined training and qualification process and its overall validation.

ENACT - press release
